Professional Summary

Senior UI Engineer with 6.5+ years of experience delivering scalable enterprise web applications using Angular. Led frontend architecture initiatives that improved application performance by and reduced regression defects through strong automation practices. Experienced in Agile development, cross-functional team collaboration, code reviews, and CI/CD implementation. Specialized in reusable component architecture, frontend performance optimization, and enterprise UI modernization.

Technical Skills

- **Frontend:** Angular, React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind
- **Architecture:** Component-Driven Development, Design Patterns, Modular UI Architecture, Performance Optimization
- **Backend Integration:** Node.js, Express.js, REST APIs
- **Databases:** MySQL, PostgreSQL
- **Testing:** Karma, Jasmine, Cypress (E2E), Testim, Unit Testing, Automation Testing
- **DevOps Exposure:** Docker (Image creation and container management), CI/CD workflow concepts, GitHub Actions (Pipeline understanding), Kubernetes (Container orchestration fundamentals)
- **Monitoring:** Kibana, Elasticsearch, Google Analytics and Google Tag Manager
- **Collaboration:** Agile Methodology, Sprint Planning, Code Reviews, Team Collaboration, Mentoring
- **Development Tools:** VS Code, Git, GitHub Copilot, Cursor IDE

Professional Experience

Senior Software Engineer

June 2019 – Present

VIT Infotech Pvt Ltd

- Led frontend architecture and UI development for enterprise-scale applications serving hospitality and SaaS domains.
- Designed modular and microfrontend-based Angular architecture enabling scalable and independently deployable UI modules..
- Conducted regular code reviews to ensure performance, scalability, and clean code principles.
- Improved page load performance and rendering efficiency..
- Increased unit test coverage to above 90% using Karma and Jasmine.
- Implemented end-to-end automation testing using Cypress and Testim, reducing regression defects.
- Collaborated with backend teams for API integration using Node.js and Express.
- Worked in Agile environment participating in sprint planning, story estimation, and technical discussions.
- Mentored junior developers and conducted regular code reviews to maintain clean code standards.
- Leveraged AI-assisted development tools (GitHub Copilot, Cursor) to accelerate feature development and improve code quality.

Project Experience

Stayntouch – Hotel Property Management System (PMS)

- Developed booking, rate configuration, add-ons and pricing modules used by hotel operations
- Developed various features for PMS, Chain and Kiosk and Mobility application.
- Implemented complex validation workflows and dynamic configuration systems.
- Optimized UI rendering and improved overall application stability.

IB-X – AI-Based Workflow & RPA Platform

- Developed UI for AI-driven RPA and BPA agent creation platform.
- Built dynamic graph-based workflow builder using AntV for node-based visualization.
- Implemented interactive drag-and-drop node configuration interfaces.
- Designed scalable UI modules for automation orchestration and agent management.

IB-Billing – Internal Enterprise Billing System

- Developed internal billing and financial workflow modules.
- Built secure and data-driven UI components for invoice management and reporting.
- Optimized performance for large financial data sets

Central Warehousing Corporation (CWC)

- Built an Management Platform for Central Warehousing Corporation (CWC) to manage project creation and tracking.
- Implemented multi-level approval workflows with role-based access control.
- Developed feedback and reporting modules for centralized monitoring and data-driven decisions.

HRMS – Human Resource Management System

- Built payroll, attendance, and employee management modules.
- Implemented secure authentication and role-based access systems.

Fitpact – Health & Fitness Application

- Migrate entire project from Angularjs to Angular and other old dependencies

AWS Pinpoint SMS Integration

- Integrated AWS Pinpoint for automated transactional SMS notifications.
- Designed event-driven notification logic within backend services.

Leadout – SaaS Platform

- Developed workflow-driven UI modules and scalable state management logic.

Education

Bachelor of Engineering
RGPV, Bhopal 84%

2015 – 2019
